

How to Use Layer List Widget

To use the Layer List widget, complete the following steps

- Click the Layer List widget to display the layer list or table of contents window. 
- If the Show Legend option is checked, click an individual layer to show its symbols.

Click the three dots on the right side of a layer to display the layer menu with the following options:

- **Zoom To**—Sets the map extent to the extent of the layer.
- **Transparency**—Sets the transparency for the layer.
- **Enable Pop-up/Remove Pop-up**—Enables or disables the pop-up for the feature layer. If a feature layer does not have a pop-up configured in the map, clicking Enable Pop-up shows all field values for the feature layer.
- **Move up**—Moves the layer one level up.
- **Move down**—Moves the layer one level down.
- **Open attribute table**—Opens the attribute table for the feature layer.
- **Description/Show Item Details**—Opens the service description or the item details page for the service or the item associated with the layer if available.
- **Click the Control all layers**  button to Control all layers to control the behavior of the layers in the list. You can turn the layers on or off, and expand or collapse the layers. Alternatively, you can use keyboard shortcuts to do the same. Press Ctrl and check the layer check box to turn the layers on or off in the same level. Press Ctrl and click the arrow to expand or collapse layers in the same level.
- **Click the search**  button Search button to find layers.
- Layers in the list are unavailable when zoomed out of their visible ranges.
- Click the close button to close the Layer List window.
